

Corten Tapered Planter

Corten Steel is a weathering steel that has a unique attribute of naturally oxidizing and developing a rusted patina finish. When placed outdoors, the climate and environment help transform the raw steel into a beautiful rusted and weathered finish that only gets better with age! Our commercial grade Taper style planters are hand welded by experienced craftsmen using only quality American made 16 gauge Corten Steel.

All our Corten Steel Taper Planters are shipped in their raw state and they are extremely strong, durable, and great for any climate. The Tapered design is a perfect accent for any commercial or residential entrance way, pool deck, balcony, or any other outdoor location.
