

Director's Chair

Classy and sleek design

You recognize good taste by the ability to continuously resist exaggeration. This unwritten law of design is reflected in the clear lines. Yet, luxurious details were not forgone.

With a distinct tendency towards perfection, the director's chairs add a significant touch of class to properties & yachts.

The extreme outdoor leather innovation was developed by one of the world's leading manufacturers of high-quality upholstery leather. It is oil and water-repellent and stain resistant. The patented formula ensures greater UV, seawater and chlorine water resistance. Combined with the powder-coated light metal aluminum frame, this easy-care real leather makes the furniture also usable outdoors, in saunas and swimming pools, as well as in a demanding maritime climate. The outdoor leather is also offered in 11 standard colors. The frame is available in 4 color variants.
